

## Sharing Overlays using Overlay Sender

Sometimes you may want to share overlays with friends or colleagues, or send an overlay home with a student. If the user does not have Overlay Maker, you can give them a copy of Overlay Sender along with your files. The Overlay sender utility program allows you to send a copy of your overlay to Intellikeys without needing or opening Overlay Maker.

### Saving the Overlay for Others

1. Open your overlay in Overlay Maker®.
2. Print an extra copy of your overlay.
3. Insert a blank floppy disk into the floppy drive.
4. From the Options menu choose **Make Overlay Sender Disk**. This will place a copy of the Overlay Sender software on the disk for others to use.
5. Save a copy of your overlay to the disk. Pull down the File menu and select **Save As**.
6. In the **Save As** window, be sure to select the drive containing your floppy disk and save a copy of the overlay to the disk as well.

### Using the Shared Overlay

1. Attach the Intellikeys keyboard to your computer.
2. Turn the computer on and insert the floppy disk.
3. Open Windows Explorer or your Overlay Maker folder (Macintosh).
4. Open the talking word processor program.
5. Slide in the Overlay.
6. Double click the floppy drive.
7. Double click the Overlay Sender icon in the folder.
8. Test your overlay.
